

Letter of recommendation

It goes without saying that using Mobile Agenda from genijusz on our conference was a great success for the organization. Not only the participants felt that they have office desk in front of them all the time, but also we as the organizers noticed, that we can focus on real issues, instead of answering the same questions all the time.

We also discovered another great benefit of using modern technology that Mobile Agenda provides. Because of the fact that it is so well integrated with QR codes, we were able to improve speaker recognition by offering participants a social game during our welcome party. The next day everyone knew each other and nobody was shy to ask a famous speaker for advice even if the problem revealed became trivial during the conversation.

To my best knowledge, there is currently no better product on the market that is able to compete with Mobile Agenda from genijusz. I would really encourage people organizing events or conferences to get it. It opens a whole new room of possibilities.

Z poważaniem
